# WELCOME TO ESSENTRA

We're manufacturers and distributors of vital component parts, working with over 70% of the world's top 100 global manufacturers. With 65 years of experience, we offer a global reach with local support.

We think you'll especially like how we work. By combining the expertise and flexibility of a manufacturer with the service and range of a distributor, we make your job easier.

# WHAT'S NEW?

We're always looking at bringing you new products that can raise the performance of your application or make your job easier – or both. Take a look at our latest solutions delivered with hassle-free service.

## SPIRALGUARD FLEX

Cut from extruded pipe to ensure maximum material memory for hose coverage and reduction in downtime. The reduced wall thickness makes the product more flexible and have an easier application.

## CABLE CHAIN

Cable chains are used to protect wires in motion from abrasion, scratching, wear and entanglement.

## MASKED EYE BOLTS

Masked eye bolts mask a thread and offer a hanging solution during painting, coating and/or the shot blasting process. They are most likely to be used with a hook or other hanging system.

## FLANGED PULL PLUGS

Silicone flanged pull plugs are chemically resistant and suitable for temperatures up to 250 °C. The pull tab allows easy insertion and the flange ensures that the product is secured in application.

## PROTECTION PLUG

The conical protective plug is designed to protect threads, holes, hoses, pipes and machines during painting, assembly or transport. The item is tapered in order to ensure a good fit.

## CAGE NUTS

The cage nuts consist of nut in a steel cage with two wings. The wings allow easy insertion. Cage nuts are typically used in the mounting rails of equipment racks.

# MORE NEW SOLUTIONS

## BLOCK LIFT GAS STRUT

The locking gas strut performs like a conventional gas strut, with the addition of a special internal locking valve that allows the strut to be locked in any position. This allows the strut to move whilst the release pin, that is located on the end of the piston rod, is depressed. Commonly used for height and controlled angle adjustment of seats and beds in various industries.

## HYGIENIC FEET

Hygienic ranges are suitable in industries such as the food, pharmaceutical and medical markets. Various items have 3A certification.

## METAL DETECTABLE CABLE TIES

Metal detectable cable ties are self-locking cables which allow quick and easy installation. They have a flammability UL94 HB Rating. The blue colour assists with detection in application. Ideal for use in food and pharmaceutical industries.

## PRESS ON KNOBS

These knobs can be pressed onto a socket head cap screw to create an instant thumbscrew without any need for glue or adhesive. It accepts metric sizes. The textured finish helps hide dirt and scratches.

## UNIVERSAL BALL/TAPERED KNOBS

The universal ball knob is a self-tapping knob. It is impact and vibration resistant. It accepts both imperial and metric sizes.

## THUMB NUTS

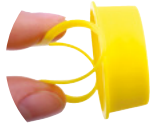

Thumb nuts have a knurled rim for easy gripping. It has an economical design for light securing and clamping applications. The textured finish helps hide dirt and scratches.
