

New from the experts

**OUR EXPANDED  
RANGE OF CAPS  
AND PLUGS TO  
SUPPORT YOUR  
PROJECTS**

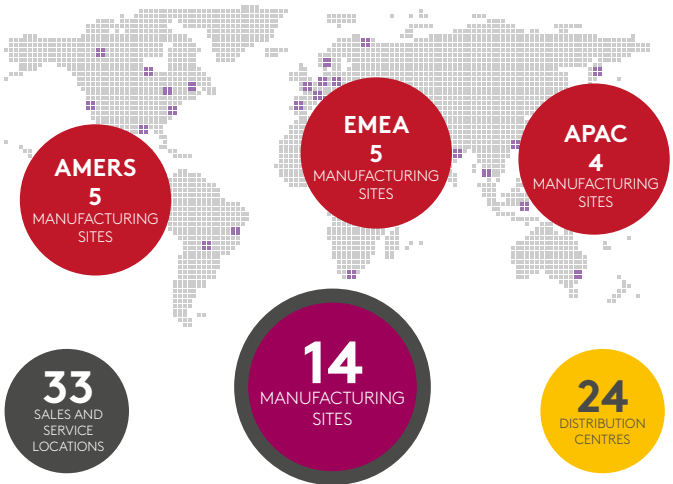

# COMPONENT MANUFACTURING EXPERTS WITH STRONG BRANDS IN CAPS AND PLUGS

We have enhanced our European manufacturing footprint and our caps and plugs portfolio with the acquisition of BMP Tappi joining our brands.

## BMP manufacturing site in Italy

## WELCOME TO ESSENTRA

**+65 YEARS**  
solving customer  
challenges

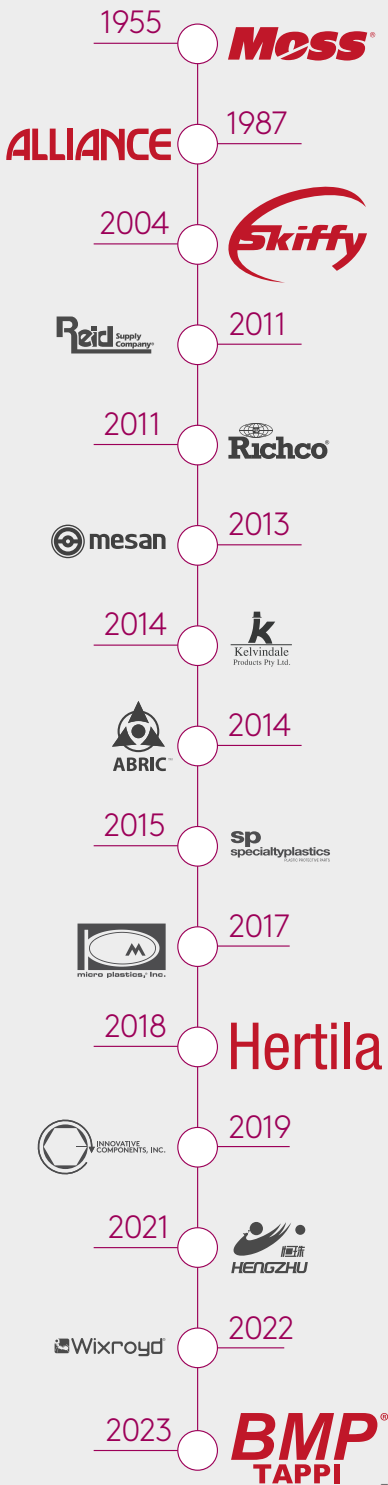

Operating in  
**28 COUNTRIES**  
worldwide

Over  
**45,000**  
products available

**60 MILLION**  
parts produced  
each week

# SUPPORTING YOUR SUSTAINABILITY GOALS

At Essentra we are aiming to be the world's leading, responsible, hassle free supplier of essential industrial components. We are committed to supporting our customers to achieve their sustainability goals and objectives, by developing sustainable industrial component solutions for them.

We have ambitious targets for reducing our emissions, which have been validated and approved by the SBTi, as being in line with a 1.5° trajectory.

## **Our Science-Based Targets:**

- Reach net-zero from our own operations by 2040, and across our value chain by 2050
- By 2030, to halve emissions in our own operations and reduce our value chain (scope three) emissions by 55% per GBP of value added

## **Manufacturing more sustainable components**

Recycled content is used as standard across a range of over 7,000 of our products globally and many of our new general protection ranges from BMP are available in recycled materials.

We continue to invest in innovation with our new Centre of Excellence, research and development centre.

We have committed to:

- 50% of raw materials from sustainable sources by 2030 across our polymer ranges
- 100% of raw materials from sustainable sources by 2030 across our general protection and security seal ranges

Our  
Planet

## Our Planet

Driving resource and energy efficiency, reducing emissions and embracing renewables

Our  
Components

## Our Components

Developing innovative products using renewables, recyclables, reusables and biodegradables.

Our  
Culture

## Our Culture

A safe, supportive work environment that champions equality and celebrates diversity.

Our  
Communities

## Our Communities

Working with suppliers to ensure ethical practices and contribute to equitable economies. Volunteering our time and supporting good causes.

Our  
Customers

## Our Customers

Providing a hassle-free service that helps customers achieve their sustainability goals.
