To whom it may concern:

We received your request for information regarding our compliance with California Proposition 65. All our products are solid carbide, which means they do contain a small percentage of cobalt which is on the list of Prop 65 chemicals. Presently, there is no set safe harbor level for cobalt metal powder. We have made sure that our documentation, digital & print media, and product labels will be compliant before the regulation comes into effect on August 30th.

We at GARR TOOL have complied with Prop 65 by taking the following actions:

1. The appropriate warnings are clearly listed on our SDS  
[https://garrtool.com/doc/pdf/SDS\\_GARR\\_TOOL.pdf](https://garrtool.com/doc/pdf/SDS_GARR_TOOL.pdf)
2. The warning is stated on each product page of our website <https://garrtool.com/>
3. Our latest catalog contains a warning for all of our products
4. Our online digital catalog lists the warning for all of our products
5. Beginning in August 2018, all newly manufactured products will have the warning printed on the product label

If you have any further questions regarding our compliance, please let me know.

Jeffrey C. Leppien  
Vice President  
GARR TOOL
