

 Buyer's Guide

A QUICK GUIDE TO ACCESS HARDWARE

ACCESS HARDWARE SOLUTIONS

From security and functionality to noise reduction in your application, there are lots of factors to take into consideration when building outdoor utility cabinets, machinery and electrical cabinets and enclosures. You'll also need to think of access hardware as part of your HVAC components and industrial generator parts.

This guide is designed to give you an introduction. We can provide 3D models (CAD files) upon request or offer our single-pack option so you can verify form, fit and function.

We can also support you with our vast range of locks, latches, handles, hinges seals and much more. Whatever you need, you can depend on us for hassle free customer service and delivery.

IP AND NEMA RATINGS

Electrical and outdoor enclosures and depending on their environment, some indoor cabinets may require a system level NEMA or IP rating. Choosing a latch or lock that meets those requirements is critical IP stands for ingress protection and NEMA stands for National Electrical Manufacturers Association. Both IP and NEMA are rating systems for equipment or systems that might be exposed to liquids, moisture, ice, corrosion and contaminates such as dust and debris.

Both ratings tell you the amount of protection against the entry of solid foreign objects and against moisture ingress. You'll find approximate conversions of IP to NEMA ratings in [The outdoor enclosure latch and lock: IP and NEMA ratings](#). Below is an example of how NEMA and IP convert. Note, the numbers in IP ratings denote protection from solids and liquids.

NEMA	IP code	NEMA Definitions	Solid Protection	Liquids Protection
4	IP65	For indoor or outdoor use Protects personnel from incidental contact with enclosed equipment Protects from falling dirt, windblown dust; rain, sleet, snow, splashing water, hose-directed water; and external formation of ice	5 = Protected against dust Limited ingress permitted	6 = Strong jets of water from all directions Limited ingress permitted

COMPRESSION LATCHES

A compression latch offers IP/NEMA protection as well as a reduction or elimination of noise and vibration. Range includes hand-operated, driver tool styles and key operated version such as key-alike, key-different, Euro-key, CH751 and high-security. You can also learn more with our [Guide to Latches](#).

FINISH:
Finishing options offer an aesthetic touch to your compression latch. These include stainless steel, chrome plated and black powder-coated

MATERIAL
Material options include zinc alloy (Zamak 5) and stainless steel

SPECIFICATION
Compression, adjustable versions, IP compliance, a variety of grip ranges, driver style locking, key-locking and padlockable versions to accommodate most application conditions

COMPRESSION LATCHES - ADJUSTABLE

[View online](#)

- 6mm compression
- IP65 compliant
- Adjustable to fit most any grip range
- Round low profile
- Cam lock lever can be used forward or reversed
- Noise and vibration isolation
- Chrome plated, stainless steel or black powder-coated finish

NEMA RATED ADJUSTABLE T-HANDLE W/COMPRESSION

[View online](#)

- Used for cabinets that need better sealing under vibration
- Quarter-turn latch
- Hand operated, ergonomic grip
- Stainless steel
- [Adjustable T-Handle w/ Compression](#) for indoor cabinets also available

FIXED COMPRESSION CAM LATCHES

[View online](#)

- IP65 cabinet compression latch
- Cam turns to locking position when key is turned 90°
- Cam turns to fixing position when key is turned 180°
- Good compression
- Good noise isolation
- Different head styles and grip ranges available
- Zinc alloy

DRAW LATCHES & KEEPERS - OVER CENTER COMPRESSION

[View online](#)

- Compression draw latch & keeper
- Low-profile design
- Keeper concealed and fastened under latch
- Black-rubber handle withstands corrosion
- Black powder-coated die-cast zinc

COMPRESSION LATCHES - ADJUSTABLE/WING KNOB

[View online](#)

- Low adjustable compression latch with wing knob seals under vibration
- Wing knob latch in choice of black powder-coated or chrome-plated zinc alloy
- Available in locking and non-locking versions

FLUSH COMPRESSION LEVER LATCHES

[View online](#)

- Flush-style trigger design
- Available with or without cylinders
- Compression lever latch suitable for 2mm door thickness (Maximum)
- Zinc alloy

HINGES

Often a full, restricted or controlled range of door motion is required when accessing your application. Using the right hinge can provide increased functionality for end users. You'll also find it helpful to read our guide, [Types of Hinges and Where to Use Them](#).

FEATURES

Whatever your application, choose from different hinge types, including [Concealed](#), [Leaf](#), [Lift Off](#), [Torque](#), [Offset](#), [Piano](#), [Side](#), [Corner](#), [Flag](#), [Strap](#), [Spring](#) and [Weld On](#)

MATERIAL

A diverse range of materials suitable for your environment including Aluminum, zinc alloy (Zamak 5), nylon, stainless steel, steel, brass and modified polyolefin copolymer

SPECIFICATION

Universal, left or right mounting orientation and a range of mounting hole shapes, securing methods and rotation angles

ADJUSTABLE TORQUE HINGES – WITH LEAF SCREW

[View online](#)

- Adjustable torque position control hinge holds door in position
- Single torque adjustment with stainless steel screw
- Nylon

LIFT-OFF SCREW MOUNT HINGE

[View online](#)

- Also known as rising butt hinges
- Heavy-door steel hinges
- Lift-off motion for easy access for maintenance and repairs
- 180° hinge rotation
- Steel

METAL CORNER HINGES

[View online](#)

- Used for steel panels on large applications
- Available as zinc alloy, nylon or stainless-steel hinges

SCREW-ON CONCEALED HINGES

[View online](#)

- Diverse range of concealed hinges
- Fastener and weld mounting
- Available in steel, stainless steel and zinc alloy
- Steel versions available with handed, pin, removable pin and spring-loaded options

CONTINUOUS HINGES – PLASTIC

[View online](#)

- Continuous hinge also known as piano hinge
- Light-to-medium duty applications such as access panels and parts of HVAC system
- Modified polyolefin copolymer

BUTT HINGE

[View online](#)

- Butt hinge designed for HVAC industry
- Sustains heavy weight
- Free-swinging
- Nylon

QUARTER-TURN LATCHES

PERFECT FOR:
 INDOOR AND
 OUTDOOR CABINETS,
 INDUSTRIAL MACHINERY,
 TOOL CABINETS, LOCKERS, FILE
 CABINETS, MARINE INDUSTRY,
 TRUCKS, TRAILERS, RAIL
 TRANSPORTATION AND
 ELECTRICAL CABINETS
 AND ENCLOSURES

Quarter-Turn Latches offer a wide range of styles from quick-install versions and spring loaded options to "L", "T" and wing style handles and padlockable features. The Quarter-Turn feature allows for easy locking and unlocking motion and come with a variety of economical choices.

FEATURES

Choose from key versions based on your security and access control requirements. Key types include: Keyed Alike, Keyed Different, and Master key system. Padlockable also available

MATERIAL

Material options include durable nylon and die-cast zinc alloy, with a black or chrome plated finish

SPECIFICATION

Varied grip ranges are available based on the door depth of the application

QUARTER-TURN SPRING LATCHES

[View online](#)

- IP65 quarter-turn spring latch
- Ideal for electrical enclosures
- Available in nylon, stainless steel and die-cast zinc alloy

QUARTER-TURN SLAM SHUT LATCHES

[View online](#)

- Also known as a push latch
- Sprung cam lifts and returns when the door is closed
- Handle types available: driver tool operated & knob

CYLINDER LOCKING QUARTER-TURN LATCHES

[View online](#)

- IP65 quarter-turn latch
- Good compression
- Good noise isolation
- Different head style and grip options available
- Die-cast zinc alloy

QUARTER-TURN LATCHES - WING KNOB

[View online](#)

- Supplied with rubber gasket for good seal
- Available in nylon, stainless steel and die-cast zinc alloy
- Available with [extra-long housing](#)

GASKETING

PERFECT FOR:
 HVACs, CABINETS,
 ENCLOSURES,
 GENERATORS

HVAC system components often need to withstand harsh conditions. Prevent vital equipment malfunctioning by isolating noise and vibration using industrial strength solutions, such as gasket tape and sealing gaskets.

FEATURES

Sealing Gasket, Trim Seal, Edge Trim, Weather Stripping and Gasket Tape

MATERIAL

Neoprene, PVC and EPDM. Note, neoprene weatherstripping tape and PVC gasket tape work well indoors; choose EPDM options for outdoor applications for its ability to resist the effects of sunlight

ADAPTABILITY

Gasketing profile can be manipulated by hand to allow flexibility during fitting

SEALING GASKETS

[View online](#)

- Clip-on profiles offering edge protection and sealing
- Used on metal sheets
- Protection from vibrations and ingress of humidity and dirt
- Provide an additional seal to enclosure boxes

WEATHER STRIPPING & GASKET TAPE

[View online](#)

- Acts as both weather stripping tape and gasket tape
- Cell foam offers great barrier protection from moisture and air
- EPDM offers excellent weather and oxidation resistance
- Adhesive gasket tape with superior conformability
- Flexibility at low temperatures

HANDLES

PERFECT FOR:
MACHINE BUILDING, CABINETS, ENCLOSURES

Industrial handles aren't just about function but also aesthetics and comfort, especially if the handle will see frequent use. We offer a wide range of ergonomically designed handles with finish options to give your machines an attractive look. To learn more about handles, read our guide

[What is an Industrial Ergonomic Handle?](#)

FEATURES

Choose from industrial pull handles, recessed, adjustable, T-Handles and L-Handles

MATERIAL

Material options include zinc alloy (Zamak 5), stainless steel, aluminum, steel, nylon 6 and nylon, polyoxymethylene, polypropylene with glass-reinforced fibers and ABS

SPECIFICATION

Range of diameters, fixing centers and projection heights to suit the environment in which your handles will be used

PULL HANDLE – THROUGH HOLE ONE SIDED

[View online](#)

- Ideal as machine handles for covers
- Front mounted with a rectangular grab handle
- Bridge, grab handle design
- Nylon 6

RECESSED HANDLES

[View online](#)

- Snap-in recessed handle
- Ideal for machinery covers
- Easy assembly by clips
- Flush design
- [Screw mount version](#) available
- Nylon 6

METAL PULL HANDLES

[View online](#)

- Flanged right-angle rectangular bar pull
- Front unthreaded through hole
- Steel

HANDLE TURN CAM LATCHES - L-HANDLE

[View online](#)

- Popular for using with electric panels and machinery covers
- Angled arm
- Available keyed alike or keyed different
- Nylon 6/6

THROUGH HOLE ANGLED ARCH PULL HANDLE

[View online](#)

- Front-install counterbored through hole
- Industrial handles ideal for machinery covers
- Bridge, grab handle for easy hand gripping
- Aluminum with nylon ends
- Also available in [steel with nylon mount](#)

ADJUSTABLE HANDLES – FEMALE FLARED

[View online](#)

- Female clamping handle for machinery or equipment parts
- Operates by simple lift and rotate action
- Push button for releasing and adjustment
- Ideal for confined spaces
- Tapered handle for convenient positioning
- Polypropylene with glass-reinforced fibers
- [Male adjustable handles also available](#)

RELIABLE SUPPORT

Let Essentra make your job easier with the peace of mind you need:

INDUSTRY-LEADING PRODUCT QUALITY

Approved against industry accreditations and standards:

ISO
14001:2015

ISO
9001:2015

OHSAS
18001

ISO
27001:2013

ISO
50001:2001

Responsive service

Support for your business with 1 billion products in stock, fast dispatch and access to a wealth of industry expertise

Supply-chain security

Lead times reduced with 12 manufacturing facilities, 33 distribution centres and 39 sales and service locations

The solutions you need

Designing and manufacturing custom solutions for your demanding requirements, as well as a wide range of off-the-shelf products

Available 3D CAD files

CADs are available for most solutions, please request yours today. If you're not quite sure which product will work best for your application, our experts can advise you

Questions? Email us at sales@essentracomponents.com or speak to one of our experts for further information on the ideal solution for your application on **800-847-0486**
