Subject: Request for Information on REACH Compliance
SVHC List 07/16/2019, 201 Substances

To Whom It May Concern:

This letter is in response to your recent request to confirm if our parts are compliant to the provisions of the new European regulation No. 1907/2006 related to REACH (the "Regulation").

Hutchinson Aerospace & Industry does not have EU-based manufacturing operations.

Hutchinson Aerospace & Industry manufactures a small number of military products which contain some of the SVHC substances. The SVHC substances are found in military paints, and chemicals. None of these parts are manufactured in a volume consuming the threshold quantity for reporting an SVHC substance. This is based on the information provided to us by our suppliers, Material Data Safety Sheets, and the knowledge of Hutchinson Aerospace & Industry employees.

We remain at your disposal to send you any further information you may consider as useful.

Yours sincerely,

Kevin Underwood
Environmental Manager
